5+ Years	20+ Apps	iOS & Android	Full Stack
Production Experience	Products Shipped	App Store & Play Store	Mobile · Node.js · AI

PROFESSIONAL SUMMARY

Full Stack AI Mobile Engineer with 5+ years of experience taking mobile products from initial screen design to production release across iOS and Android, with 20+ shipped applications for startups and enterprise teams. Strong expertise leading cross-platform mobile architecture in React Native and TypeScript, paired with full backend ownership in Node.js, Express.js, and MongoDB.

Hands-on experience wiring OpenAI GPT, Anthropic Claude, and Google Gemini into production mobile workflows — covering conversational chat, intelligent search, and task automation — alongside Web2 and Web3 mobile capabilities including multi-chain crypto wallets, payment integrations, deep linking, universal links, push notifications, and App Store and Play Store delivery.

TECHNICAL SKILLS

Mobile Engineering	**React Native (iOS & Android)**, **TypeScript**, JavaScript (ES6+), Cross-Platform Architecture, Native Modules & Bridging, Redux, Responsive Mobile UI, **Payment Integrations**, **Deep Linking**, Universal Links & App Links, Push Notifications, App Store & Play Store Releases
Backend & APIs	**Node.js**, **Express.js**, **MongoDB**, RESTful APIs, Microservices Architecture, JWT & OAuth Authentication
AI & LLM Systems	**OpenAI API (GPT)**, **Anthropic Claude**, **Google Gemini**, Meta Llama, Hugging Face, LangChain, AI Agents, Prompt Engineering, Chatbots, MCP, AI Orchestration
Web3 & Wallets	**WalletConnect**, **Web3.js**, **Ethers.js**, Smart Contract Integration, Multi-Chain Wallets (STX, BNB, ETH, SOL), In-App Token Swaps & dApp Connections
Databases & Cloud	**MongoDB**, **Firebase Firestore**, Realtime Database, PostgreSQL, MySQL, Redis, AWS, Microsoft Azure, Google Cloud Platform, Docker, Kubernetes, Git & GitHub CI/CD, Monitoring & Logging

PROFESSIONAL EXPERIENCE

Full Stack Mobile Engineer · RapidDev — USA Company (Working Remotely)

May 2025 – Present

- Lead React Native mobile architecture and end-to-end product delivery for iOS and Android applications, collaborating remotely with a USA-based engineering and product team.
- Design, build, and maintain scalable backend services and RESTful APIs in Node.js and Express.js, backed by MongoDB and secured with JWT and OAuth authentication flows.
- Integrate OpenAI GPT, Anthropic Claude, and Google Gemini into mobile workflows to power conversational AI chat, semantic search, and automated user experiences.
- Implement payment integrations, deep linking, universal links, App Links, and push notifications, and manage automated release pipelines with Docker and GitHub CI/CD.
- Drive mobile performance optimization, crash reduction, and code quality through profiling, architecture reviews, and mentoring junior developers.

PROFESSIONAL EXPERIENCE (CONTINUED)

Full Stack Mobile Engineer · KryptoMind (Pvt) Ltd. — Lahore, Pakistan

Jun 2023 – May 2025

- Owned end-to-end delivery of multiple Web2 and Web3 mobile applications in React Native and TypeScript, from system architecture through App Store and Google Play Store releases.
- Architected and shipped the multi-chain STX Wallet supporting STX, BNB, ETH, and SOL networks, including in-app token swaps, WalletConnect, Web3.js, and Ethers.js integrations.
- Built Node.js and Express.js backend microservices and data layers across MongoDB, PostgreSQL, Firebase Firestore, and Redis for low-latency mobile experiences.
- Delivered complex mobile features including deep linking, push notifications, in-app payment flows, and AI-assisted chat and workflow automation.
- Partnered closely with blockchain, backend, and UI/UX teams, conducted code reviews, and mentored junior React Native engineers.

Full Stack Mobile Engineer · Ammag Technologies — Lahore, Pakistan

Dec 2021 – Jun 2023

- Built responsive cross-platform mobile screens and reusable UI component libraries in React Native, TypeScript, and JavaScript for iOS and Android applications.
- Integrated Node.js and Express.js REST APIs, Redux state management, and MongoDB and SQL data sources across production mobile features.
- Handled app debugging, secure authentication flows, device responsiveness testing, and App Store and Play Store publishing alongside senior engineers.

SELECTED PROJECTS (FROM 20+ SHIPPED APPLICATIONS)

STX Wallet — Multi-Chain Crypto Wallet with Swaps & WalletConnect

Aug 2023 – Dec 2024

A secure multi-chain cryptocurrency wallet for STX, BNB, ETH, and SOL, enabling users to send, receive, swap tokens, and connect to decentralized applications on iOS and Android.

Stack: React Native · TypeScript · Node.js · Express.js · REST APIs · WalletConnect · Web3.js · Ethers.js

- Developed the cross-platform wallet in React Native and TypeScript, supporting asset management, send/receive flows, and real-time balance tracking across four blockchains.
- Implemented in-app token swap functionality and integrated WalletConnect, Web3.js, and Ethers.js so users could interact with dApps securely without leaving the app.
- Connected mobile transaction workflows to Node.js and Express.js backend services focused on signing security, clear transaction UX, and cross-chain reliability.

LocalShows — Mobile Event Discovery & Community Platform

May 2024 – Mar 2025

A community-driven mobile event discovery application with category browsing, rich event details, community posts, and personalized user profiles.

Stack: React Native · TypeScript · Node.js · Express.js · REST APIs · MongoDB · Firebase Firestore

- Built responsive, API-backed React Native and TypeScript screens for discovering local events, filtering by category, publishing community posts, and managing user profiles.
- Designed data flows across Node.js REST APIs, MongoDB, and Firebase Firestore to keep feeds, event updates, and community interactions fast and reliable.

You Waggle — Cross-Platform Item Management Mobile App

May 2025 – Feb 2026

A cross-platform mobile application that helps users organize, track, and interact with items in one streamlined workspace.

Stack: React Native · TypeScript · Node.js · Express.js · REST APIs · MongoDB

- Built the React Native mobile application end to end, delivering core create, read, update, and item-interaction workflows with a clean, modular component architecture.
- Integrated Node.js and Express.js REST APIs with MongoDB persistence, tuning list rendering and navigation for smooth iOS and Android performance.

EDUCATION

Bachelor of Software Engineering
University of Agriculture Faisalabad · Aug 2017 – Oct 2021

AWARDS & RECOGNITION

Employee of the Month Award
Punctuality Award
